

RECYCLE YOUR STYROFOAM!

The Ramsey Environmental Commission/Green Team and the Upper Saddle River (USR) Environmental Committee urge residents to recycle Styrofoam. Four collection drives, open to both Ramsey and USR residents, will be held in December and January.

Styrofoam recycling is difficult, but reuse is a great alternative, and you can help. Bring your styrofoam packaging to a collection drive. The material will be transported to a facility that uses it to generate construction materials, widely used in projects ranging from buildings and stadiums, roadways, and commercial landscaping.

Styrofoam packaging must be:

- Clean, dry and uncontaminated

Please, **NO**:

- Packing peanuts
- Food containers (to-go boxes or cups)
